THE PLAY OF *Light* ON RELIEF

These textured glasses combine refined design with a rich sensory experience. Their distinctive relief pattern defined by clean lines and a rhythm of raised and recessed surfaces - captures and refracts light, giving every drink a sense of depth and a subtle, luminous glow.

Carefully shaped for both aesthetics and comfort, each glass sits securely in the hand, offering a confident, non-slip grip. The layered design unfolds from a textured base to a smooth transitional ring, before flowing into expressive wave-like contours - creating a silhouette that is both dynamic and harmonious.

Versatile by nature, these glasses are suited to water, soft drinks, cocktails, or whisky. By day, they enhance relaxed summer settings; by evening, they lend a quiet sophistication to more intimate moments.

A considered balance of form, light, and touch, these glasses embody understated luxury and refined style.
