Glasses

THE LIGHTNESS OF A *Summer Mood*

Polycarbonate glasses offer a modern way to serve drinks in summer, combining elegant design with comfort and everyday practicality. They are made for light, carefree moments – picnics in the park, poolside gatherings, terrace dinners, and sunset cocktails on warm evenings.

Thanks to the polycarbonate material, the glasses are exceptionally lightweight and comfortable to hold. Even when filled with ice and a drink, they feel balanced in the hand rather than heavy. At the same time, they are highly durable and resistant to breaking, making them perfect for both home use and outdoor occasions.

Another advantage is that polycarbonate warms up more slowly than traditional glass, helping drinks stay cooler for longer. This makes them especially well-suited for summer cocktails, sparkling wines, and refreshing beverages, where maintaining that crisp, chilled sensation is part of the experience.

The collection includes a wide variety of shapes, from simple, versatile everyday designs to more distinctive silhouettes created for sparkling wines, cocktails, and refined presentations. Some pieces have a timeless, classic feel, while others are more modern and graphic, featuring decorative textures that play beautifully with light.

Together, these glasses bring together aesthetics, functionality, and a contemporary lifestyle. Lightweight, highly durable, and elegant, they let you enjoy every drink freely and effortlessly, without compromise – while still preserving a sense of refined presentation and understated style.
