Professional Service Range

Essential solutions for the HoReCa sector, where functionality, quality of materials and understated aesthetics meet the demands of daily professional use.

The white porcelain range features simple, versatile shapes. Its pure colour, smooth surface, balanced proportions and comfortable weight make it a practical foundation for professional service. Special attention is given to functionality: the pieces stack easily, and certain items in the «Olympus» series are dual-purpose, as the same piece can serve as both a container and a lid.

Cutlery is available in three colours and three surface finishes: mirror, matte and vintage. These design options let you choose a solution that suits the character of your interior and serving concept, from a classic shine to a more understated, contemporary look.

The Bistro collection offers a core range of professional glassware for everyday use, including glasses for wine, champagne, cocktails and spirits, tumblers for water and soft drinks, and jugs and other essentials. Clean lines, balanced proportions, practicality and durability come together here with an excellent balance of quality and value.

Rounding out the buffet service range are chafing dishes, gastronorm containers and heating systems. Their thoughtful design is built to withstand intensive use, while the stainless steel, transparent lids and variety of metal finishes give the equipment a sophisticated look. The silver finish, with gold and bronze accents, helps complement the style of the space and highlight the quality of the buffet range.

The Wilmax HoReCa range is a professional foundation where functionality, reliability and aesthetic appeal work together to ensure the quality of everyday service.
